Our Values

Belonging, Equity, Inclusion

We strive to create community in ways that value and respect each other's humanity and the diversity of lived experience while welcoming dialogue across viewpoints and positions to ensure that all can contribute authentically.

Collaboration

We work together internally and within the broader economic policy ecosystem to produce a common vision for the future.

Credibility

We approach our work with integrity, transparency, and rigor and hold ourselves accountable to elevate evidence to shape policy outcomes.

Innovation

We are nimble and take bold action, seeking continuous improvement and learning to think and act in new ways.

Pragmatism

We build bridges internally and externally to seize opportunities and create wins toward our goals in ways that are aligned with our values.
